

Multi-Trade Quote Generation Hub

A comprehensive SaaS platform for managing multi-trade quote generation with role-based access, interactive quote builders, and external system integrations.

Live Demo

Application URL: <https://srfnqtwu0m.space.minimax.io>

Demo Credentials

Global Admin Access:

- Email: `admin@quotehub.com`

- Password: `demo123`

Trade Company User Access:

- Email: `john@acmeelectrical.com`

- Password: `demo123`

Features

Global Admin Interface

- **Platform Dashboard** - Comprehensive platform statistics and monitoring
- **Trade Management** - Define trades, quote fields, and templates
- **Conversational Flow Builder** - Visual drag-and-drop interface for interactive quote collection
- **Company Management** - Create and manage trade companies with trade assignments
- **User Management** - Role-based user account management with bulk operations

- **Platform Settings** - Global configuration, security settings, and system monitoring

Trade Company User Interface

- **Business Dashboard** - Company-specific metrics and quick actions
- **Business Settings** - Complete business information and system configuration
- **Products & Services** - Product catalog management with margin rules
- **Client Management** - Customer database with GoHighLevel integration
- **Quote Management** - Create, manage, and track quotes with status workflow
- **Integrations** - External system connections (GoHighLevel, Make.com, Google Sheets)

Key Capabilities

- **Multi-Tenant Architecture** - Strict data segregation between companies
- **Role-Based Access Control** - Global Admin vs Trade Company User permissions
- **Interactive Quote Generation** - Conversational flows and standard forms
- **Margin Adjustment** - Real-time quote calculation with margin override
- **External Integrations** - CRM sync, automated export, and webhook support
- **Responsive Design** - Desktop and tablet optimized interfaces

🔧 Technology Stack

- **Frontend:** React 18, TypeScript, Tailwind CSS
- **UI Components:** Radix UI, Lucide React Icons
- **State Management:** React Context API, React Query
- **Routing:** React Router v6
- **Form Management:** React Hook Form with Zod validation
- **Drag & Drop:** React DnD for flow builder

- **Backend Ready:** Firebase/Firestore integration setup
- **Build Tool:** Vite
- **Package Manager:** pnpm

Development Setup

Prerequisites

- Node.js 18+
- pnpm package manager

Installation

```
# Clone the repository
git clone <repository-url>
cd quote-generation-hub

# Install dependencies
pnpm install

# Start development server
pnpm dev

# Build for production
pnpm build
```

Environment Variables

```
VITE_FIREBASE_API_KEY=your_firebase_api_key
VITE_FIREBASE_AUTH_DOMAIN=your_project.firebaseio.com
VITE_FIREBASE_PROJECT_ID=your_project_id
VITE_FIREBASE_STORAGE_BUCKET=your_project.appspot.com
VITE_FIREBASE_MESSAGING_SENDER_ID=your_sender_id
VITE_FIREBASE_APP_ID=your_app_id
```

Key Features Implemented

Authentication System

- Demo credentials for immediate testing
- Role-based routing and access control
- Persistent login sessions
- Secure logout functionality

Global Admin Functionality

- **Trade Management:** Complete CRUD operations for trades, quote fields, and templates
- **Conversational Flow Builder:** Visual canvas with drag-and-drop nodes for creating interactive quote flows
- **Company Management:** Create companies, assign trades, manage users
- **User Management:** Bulk operations, role assignment, company association
- **Platform Settings:** Global configuration, security, integrations, and monitoring

Trade Company User Functionality

- **Business Configuration:** Complete business setup with logo, terms, and system settings
- **Product Catalog:** Comprehensive product/service management with categories and margins
- **Client Management:** CRM integration with GoHighLevel sync capabilities
- **Quote Workflow:** Status-based quote management from draft to accepted
- **Integration Hub:** External system connections with webhook configuration

Advanced Features

- **Responsive Design:** Optimized for desktop and tablet devices
- **Interactive UI:** Smooth transitions, loading states, and visual feedback
- **Data Validation:** Form validation with error handling
- **Mock Data:** Comprehensive demo data for testing all features
- **Export Functionality:** Quote export with external automation support

Testing Results

The application has been thoroughly tested and verified:

- ✓ **Login System:** Both demo accounts work perfectly
- ✓ **Navigation:** All routes and layouts function correctly
- ✓ **Global Admin Interface:** All management features operational
- ✓ **Company User Interface:** Complete business workflow functional
- ✓ **Responsive Design:** Optimal display across device sizes
- ✓ **Data Management:** CRUD operations work as expected
- ✓ **Integration Features:** External system connection interfaces ready

External Integration Support

Supported Integrations

- **GoHighLevel:** Client sync and CRM integration
- **Make.com:** Quote export and automation workflows
- **Google Sheets:** Advanced rebate calculations and data export
- **Email Services:** Quote delivery and notifications
- **Webhooks:** Custom automation endpoints

Integration Features

- OAuth flow preparation for GoHighLevel
- Webhook configuration for Make.com automation
- Service account setup for Google Sheets
- Email template configuration
- Real-time sync status monitoring

Scalability & Architecture

Multi-Tenant Design

- Strict data segregation between companies
- Role-based access control
- Scalable database structure
- Company-scoped data services

Performance Optimizations

- Code splitting with dynamic imports

- Optimized bundle size
- Efficient state management
- Minimal re-renders with React optimization

Security Features

- Role-based route protection
- Input validation and sanitization
- Secure authentication flow
- API key management system

Design System

Color Palette

- **Primary:** Teal/Blue gradient scheme
- **Secondary:** Gray scale for backgrounds
- **Accent:** Green for success, Red for errors, Yellow for warnings
- **Professional:** Clean, minimalist aesthetic

UI Principles

- **Consistency:** Unified component library
- **Accessibility:** Proper contrast and navigation
- **Responsiveness:** Mobile-first approach
- **Usability:** Intuitive workflows and clear feedback

Documentation

User Guides

- Global Admin workflow documentation
- Trade Company User operation manual
- Integration setup guides
- Troubleshooting documentation

Technical Documentation

- API service documentation
- Component library reference
- Type definitions and interfaces
- Database schema documentation

Deployment

The application is configured for easy deployment:

- **Build Command:** `pnpm build`
- **Output Directory:** `dist/`
- **Environment:** Production-ready with optimizations
- **CDN Ready:** Static asset optimization

Support

For questions, issues, or feature requests:

- Review the comprehensive demo at the live URL
- Test both user roles with provided credentials
- Explore all features and integrations
- Check the extensive UI/UX implementation

Built with modern web technologies for enterprise-grade quote generation and business management.
